

MEMBER OF THE MONTH

The Allegrone Companies are a fourth-generation business comprised of Allegrone Construction Co., Allegrone Masonry, Allegrone Home Builders, and Allegrone Real Estate. As a proud member of the Berkshire Chamber of Commerce, a professional leader in Berkshire County, promoting change, growth and sustainable business, the Allegrone Companies remain committed to a consistent vision.

With the design, construction, and maintenance of buildings having an overwhelming impact on our environment and natural resources, Allegrone Companies have chosen to embrace sustainable and green business practices. Buildings use roughly one-third of all the energy consumed in the U.S., and two-thirds of all electricity. They are also a major source of the pollution that causes urban air quality problems, and contribute to climate change.

As a member of the U.S. Green Building Council, and through the LEED (Leadership in Energy Environmental Design) program, Allegrone's mission is consistent with that of the USGBC: To transform the way buildings and communities are designed, built and operated, enabling an environmentally and socially responsible, healthy, and prosperous environment that improves the quality of life. The adoption of green building practices offer our building and development

industry an opportunity to create environmentally-sound and resource-efficient buildings by using an integrated approach. Green buildings promote resource conservation, such as energy efficiency and renewable energy, consider environmental impacts and waste minimization, create a healthy and comfortable environment, and address historical preservation issues.

The Allegrone Companies hope to provide tangible examples within the Berkshires of what green building can accomplish in terms of comfort, aesthetics, and energy and resource efficiency. Allegrone is currently undergoing a complete redevelopment and expansion at 150 Pittsfield Road in Lenox into a Platinum Level LEED registered office park. The new, green office complex will feature state-of-the-art mechanical systems, incorporating geothermal and solar technologies, an abundance of natural lighting, enhanced air quality, and thermal comfort, yielding a more productive and comfortable work environment for its occupants.

Sustainability is more than green building; Allegrone prides themselves on the longevity of their staff and history of many successful partnerships. They believe in leaving an intentionally small footprint and strive to conduct their various businesses in an environmentally-aware manner.
